

COTA

Accelerate research with customizable scientific support from RWD experts

ABOUT COTA'S REAL-WORLD INSIGHTS SERVICES

We offer best-in-industry data science and analytics services to help partners achieve their clinical research goals.

Our flexible research offerings are:

- × Delivered by elite researchers and data scientists
- × Staffed by dedicated resources who will work on your projects only
- × Useful in supporting the construction of external or hybrid control arms adhering to latest FDA/EMA guidance on RWD

USE CASES

Real-world insight services can be applied to:

- × Comparative effectiveness studies
- × Real-world treatment outcomes
- × Mechanism of action/outcomes
- × Support for external controls and comparators from concept to TLFs for your dossier
- × Market access
- × Research publications

ABOUT COTA

Bringing clarity to cancer

Founded in 2011 by doctors, engineers and data scientists to create clarity from fragmented and often inaccessible real-world data. COTA curates fit-for-purpose, regulatory-grade oncology RWD from structured and unstructured EHR data that is used across the drug development lifecycle.

Our data is ready for analysis and contains clear longitudinal patient journeys that support regulatory submissions and research questions about treatment patterns, real-world outcomes, and comparisons.

2M+ Cancers lives in our network

1,500+ Oncologist across our network

3 FDA and EMA approvals
